

Email to Fax

Email to Fax is an ideal fax service that enables users the flexibility to send Internet fax directly from their standard email client to any fax number in the world.

Many users will enjoy the ease of sending faxes directly from their existing email client without the need of installing additional software on their PC. Users may more easily manage their communications by maintaining all faxes and emails sent in a single client application such as Microsoft Outlook. After sending an email to fax, users will receive a detailed fax confirmation via email.

Email to Fax Service offers many features and benefits:

- Users may fax a simple fax note or attach up to three files for Internet Faxing
- Supports all the most popular file attachments
- Real-time Internet Fax Web Reporting
- Web-based Internet Fax Resend Capabilities.
- Almost Real-time Detailed Email Confirmations of Internet Faxes Sent
- Auto Retry with multiple route options for the highest success rate
- Send from any mail client
