

Fax to Email

Fax to Email is a popular Internet Fax service that allows users to receive faxes directly to their inbox.

Users of the Fax to Email Internet Fax service will enjoy the following benefits:

- Receiving all of their faxes in their own email account or multiple email accounts
- Security: All Fax to Email are TLS encrypted assuming recipient's email service supports TLS
- Ability to electronically store important documents
- Delete 'junk' or unwanted faxes without wasting fax paper or toner
- Quickly forward or email received faxes to colleagues or associates
- Real-time web reporting and management of faxes
- Faxes are received in standard PDF or TIFF formats for easy viewing
- Combine with Email to Fax, Web to Fax and PC to Fax to create a 'Virtual Fax Machine' on your PC
- Eliminates the need for costly fax machines, fax servers, fax lines and greatly reduces paper and toner cost
- Improved productivity by utilizing Fax to Email services directly from their PC
