

Print to Fax

PC to Fax (Print to Fax) enables users to 'Print' to a fax machine directly from their Internet-enabled PC. PC to Fax is very convenient and powerful. Clients using PC to Fax simply open the document they want to fax, go to file/print and select Internet Fax as their printer.

The fax is then sent via the Internet to the Data Center and out over the secure and reliable fax network for delivery. PC to Fax is also available with TLS encryption keeping fax data safe!

PC to Fax has many valuable features including:

- Address Book for Keeping Most Used Fax Numbers
- Real-time Status Reporting on User's PC
- Cover Page Generation in 3 Different Formats
- Fax File Cabinet for Storing, Viewing and Resending Sent Faxes
- Fax Anything That Can Be Printed

PC to Fax can be used in conjunction with Email to Fax, Web to Fax and Fax to Fax for greatest convenience.
